ALEX MICCA

Alessandro Micca, known as Alex Micca, is a techno DJ and producer whose passion for electronic and percussive sounds began in childhood. Growing up surrounded by electronic music, he developed a distinctive style that blends sound experimentation with the driving energy of techno. Whether performing DJ sets or studio production, he seamlessly combines instruments and samples to craft hypnotic, immersive rhythms inspired by techno and Berlin's dub techno scene.

His performances are sensory journeys—deep, emotional, and designed to connect powerfully with the audience. Soon after stepping into production, he released his debut EP To The Moon on Gain Records in 2024, which quickly climbed into the top ten and stayed there for weeks, confirming his rising influence in the electronic scene.
